OUR SERVICES

SURVEILLANCE SECURE SYSTEMS

- Recognized leader in providing video-centric smart IoT solutions and comprehensive security services.
- Network Cameras: latest generation of High-definition cameras equipped with advanced imaging technology for crystal-clear video surveillance.
- Network Recorders (DVR & NVR): Cutting-edge recording devices that support high-resolution video storage and provide seamless integration with other systems.
- Storage Solutions: Scalable and secure storage options for retaining critical surveillance data, tailored to meet the demands of various business sizes.
- Access Control & Time Attendance: Integrated systems for managing facility access and ensuring precise attendance tracking with customizable solutions.
- Fire Alarm Systems: Advanced fire detection and alerting systems that prioritize safety and enable rapid emergency response.
- Intelligent Video Surveillance (IVS): AI-driven video analytics for real-time monitoring, pattern recognition, and proactive threat detection.
- Video Intercom Systems: Secure and user-friendly communication systems that combine convenience with safety for residential and commercial use.
- Alarm Systems: Comprehensive alarm solutions designed to detect and alert against intrusions, ensuring round-the-clock protection.
- Time Attendance Solutions: Modern attendance tracking systems that streamline workforce management and enhance organizational efficiency.

OUR SERVICES

IT INFRASTRUCTURE & DATA CENTER SOLUTIONS

- We also provide robust IT infrastructure services, ensuring the backbone of your organization is built for reliability, scalability, and efficiency. Our expertise includes:
- **Structured Cabling:** Comprehensive cabling solutions for voice, data, and multi-media communication, designed to support current and future technologies.
- **Data Center Design & Implementation:** Expertly designed and implemented data centers with state-of-the-art technology to meet your operational demands.
- **Server Room Setup:** Turnkey solutions for server room planning, setup, and maintenance, ensuring high availability and security.
- **Power Management Systems:** Reliable power distribution and backup systems to guarantee uninterrupted operations.
- **Cooling & Environmental Control:** Advanced cooling solutions to maintain optimal operating conditions for IT equipment.
- **Network Infrastructure:** High-performance network design and implementation for seamless connectivity and scalability.
- **Rack & Enclosure Solutions:** Customized rack and enclosure systems to optimize space and enhance equipment management
- With our integrated approach to security, IT infrastructure, and data center services, we ensures your organization is equipped with cutting-edge technology and infrastructure to thrive in an ever-evolving digital landscape

OUR SERVICES

IT MANAGED SERVICES AND OUTSOURCING

- At AFAQ, we provide comprehensive IT Managed Services and Outsourcing Solutions designed to streamline your IT operations, reduce costs, and allow your organization to focus on its core business objectives. By partnering with us, you gain access to a team of skilled professionals and state-of-the-art technology, ensuring your IT infrastructure is managed efficiently and proactively.
- IT Managed Services
Our managed IT services deliver proactive monitoring, maintenance, and support for your entire IT ecosystem.
- Proactive IT Monitoring: Continuous monitoring of your IT infrastructure to identify and resolve issues before they impact operations.
- Helpdesk and Technical Support: Dedicated 24/7 support to address user issues and ensure seamless operations.
- Patch Management: Regular updates and security patches for all systems to protect against vulnerabilities
- Backup and Disaster Recovery: Automated data backups and comprehensive recovery plans to safeguard your business-critical information.
- Cybersecurity Management: Proactive defense against cyber threats, including endpoint protection, firewall management, and security audits.
- Cloud Management: Monitoring and optimization of cloud environments, ensuring maximum performance and cost efficiency.

FOR INFORMATICS TECHNOLOGY & SYSTEM

OUR SERVICES

- **Vendor Management:** Coordination with third-party vendors to ensure smooth service delivery and resolve issues efficiently.
- **IT Outsourcing Services**
Our IT outsourcing solutions provide businesses with access to skilled IT professionals and resources without the need to build an in-house team
- **Dedicated IT Teams:** Outsource specific IT functions, such as network management, software development, or security, to our team of experts.
- **Flexible Staffing Solutions:** Scale your IT workforce up or down based on project needs and business demands.
- **Cost Optimization:** Reduce expenses by leveraging outsourced expertise, avoiding the cost of hiring, training, and retaining in-house staff.
- **Project-Based Outsourcing:** Specialized teams for short-term or long-term projects, ensuring on-time delivery and quality execution.
- **On-Site and Remote Support:** Flexibility to provide support either on-premises or remotely, depending on your requirements.
- **Strategic IT Planning:** Assistance with IT strategy, budgeting, and technology roadmaps to align IT with business goals.

OUR SERVICES

IT INFRASTRUCTURE SECURITY

- At AFAQ, we prioritize the security of your IT infrastructure to protect your business from evolving cyber threats and ensure compliance with industry standards. Our Infrastructure Security Solutions provide comprehensive protection across networks, systems, and data, delivering peace of mind in today's digital age.
- Our Infrastructure Security Services Include:
 - Firewall Implementation and Management: Deployment of next-generation firewalls (NGFWs) to monitor and control network traffic, block unauthorized access, and protect against external and internal threats.
 - Intrusion Detection and Prevention Systems (IDPS): Real-time monitoring and automatic response to potential threats, ensuring proactive network defense.
 - Endpoint Security: Advanced protection for devices such as laptops, desktops, and servers through antivirus, anti-malware, and endpoint detection and response (EDR) solutions.
 - Network Access Control (NAC): Restrict access to your network based on predefined security policies to ensure only authorized users and devices are allowed.
 - Data Encryption: End-to-end encryption solutions for protecting sensitive data during storage and transmission.
 - Virtual Private Networks (VPN): Secure remote access for employees and branch offices, ensuring encrypted and private communication.
 - Multi-Factor Authentication (MFA): Implementation of additional authentication layers to secure access to critical systems and applications.
 - Security Information and Event Management (SIEM): Centralized logging and real-time analysis of security events to detect, analyze, and respond to incidents effectively.

OUR SERVICES

ROUTING AND SWITCHING SOLUTIONS

- Our Routing and Switching solutions are designed to ensure high-performance connectivity, scalability, and reliability for your IT infrastructure. These services provide a solid foundation for seamless communication across your organization, supporting both local and global networks.
- Network Design and Optimization: End-to-end network architecture planning to ensure efficiency, reliability, and scalability.
- Enterprise Routing Solutions: Implementation of advanced routers for optimal traffic management, load balancing, and secure data transmission.
- Switching Solutions: Deployment of Layer 2 and Layer 3 switches to deliver high-speed data transfer and robust network segmentation.
- WAN and LAN Connectivity: Comprehensive solutions for setting up Wide Area Networks (WAN) and Local Area Networks (LAN) to enable seamless collaboration and communication
- Redundancy and Failover Systems: Integration of redundant systems and failover mechanisms to ensure uninterrupted network availability.
- Quality of Service (QoS): Configuration of QoS policies to prioritize critical applications and optimize bandwidth usage.
- Cloud Integration: Seamless integration of cloud-based networking solutions to enhance scalability and flexibility.
- Monitoring and Maintenance: Continuous network monitoring, performance analysis, and proactive maintenance to prevent downtime and optimize operations.
- With our Routing and Switching solutions, your organization can achieve superior connectivity, enhance operational efficiency, and maintain a secure and scalable IT environment to ensure your business stays ahead in the fast-paced digital landscape

OUR SERVICES

WIRELESS SOLUTIONS

- we understand the critical role of wireless connectivity in today's fast-paced, technology-driven world. Our Wireless Solutions are designed to provide secure, reliable, and high-performance wireless networks that cater to the needs of organizations of all sizes.
- Our Wireless Solutions Include:
 - Wireless Network Design: Customized planning and deployment of wireless networks, ensuring seamless coverage and optimal performance across your premises.
 - Wi-Fi Access Points: Installation of enterprise-grade access points to deliver high-speed connectivity and support for multiple devices
 - Indoor and Outdoor Wi-Fi Solutions: Comprehensive wireless coverage for indoor office spaces and outdoor areas, ensuring connectivity in all environments.
 - Wireless Mesh Networks: Scalable and self-healing mesh networks for uninterrupted connectivity across large or complex sites.
 - Guest Wi-Fi Solutions: Secure and easy-to-manage guest access networks with advanced authentication and usage control.
 - Wi-Fi 6 and Beyond: Deployment of the latest wireless standards to support higher speeds, greater capacity, and reduced latency.
 - RF Site Surveys: Professional surveys to identify optimal access point placement, minimize interference, and ensure maximum coverage.
 - Seamless Roaming: Configuration of networks to allow users to move freely without experiencing connectivity drops.
 - IoT and Smart Device Integration: Wireless solutions designed to support IoT devices, enabling smarter operations and automation.
